# **CENTURY HOLDINGS**

# **HAZARD COMMUNICATION PROGRAM (GHS)**

# (Global Harmonizing System)

The purpose of this program is to ensure that potential hazards and hazard control measures for chemicals, materials and substances used by this company are understood by company employees.

This written program is available for employee review at any time. It is located at:

S:\Safety Docs\00 Procedures\01 Facility\OFFICIAL HAZARD COMMUNICATION PROGRAM 2024.docx

## I. CONTAINER LABELING:

Our receiving clerk (Lee Older-Folkes has been trained) will verify that all containers received for use by this company will:

Be clearly labeled as to the contents, matching identification on the SDS.

List the name and address of the manufacturer.

Note the appropriate hazard signal wording \*

"DANGER" or "WARNING"

<u>Physical Hazards</u> (16)

Explosives Flammable Gases Flammable Aerosols Oxidizing Gases Gases Under Pressure Flammable Liquids Flammable Solids Self-Reactive Substances Pyrophoric Liquids Pyrophoric Solids Self-Heating Substances Substances which, in contact with water, emit flammable gases Oxidizing Liquids Oxidizing Solids Organic Peroxides Corrosive to Metals

### Health Hazards (10)

Acute Toxicity Skin Corrosion/Irritation Serous Eye Damage/Eye Irritation Respiratory or Skin Sensitization Germ Cell Mutagenicity Carcinogenicity Reproductive Toxicology Target Organ Systemic Toxicity – Single Exposure Target Organ Systemic Toxicity – Repeated Exposure Aspiration Toxicity

### Hazardous to the Aquatic Environment:

Acute aquatic toxicity Chronic aquatic toxicity Bioaccumulation potential Rapid degradability

Flame over circle	Flame	Exploding bomb
• Oxidizers	<ul> <li>Flammables</li> <li>Pyrophorics</li> <li>Self-Heating</li> <li>Emits Flammable Gas</li> <li>Self Reactives</li> <li>Organic Peroxides</li> </ul>	<ul> <li>Explosives</li> <li>Self Reactives</li> <li>Organic Peroxides</li> </ul>
Skull and crossbones	Corrosion	Gas cylinder
	E Z	$\Leftrightarrow$
Acute toxicity (severe)	Corrosives	Gases under pressure
Health Hazard	Environment	Exclamation mark
	*	
Carcinogen	Aquatic Toxicity	Irritant
Mutagenicity		Skin Sensitizer
<ul> <li>Reproductive Toxicity</li> <li>Respiratory Sensitizer</li> </ul>		<ul> <li>Acute Toxicity (harmful)</li> <li>Narcotic effects</li> </ul>
Target Organ Toxicity		Respiratory Tract Irritation
Aspiration Toxicity		Hazardous to Ozone Layer

First Aid	

#### If exposed call Poison Center. If on skin (on hair): Take off immediately any contaminated clothing. Rinse skin with water.

No Containers Will Be Released for Use Until The Above Data Is Verified.

### II. SAFETY DATA SHEETS (SDS): (16)

- 1. Product and Company Identification
- 2. Hazard Identification
- 3. Composition / Information On Ingredients
- 4. First Aid Measures
- 5. Fire Fighting Measures
- 6. Accidental Release Measures
- 7. Handling and Storage
- 8. Exposure Control / Personal Protection
- 9. Physical and Chemical Properties
- 10. Stability and Reactivity
- 11. Toxicological Information
- 12. Ecological Information
- 13. Disposal Considerations
- 14. Transport Information
- 15. Regulatory Information
- 16. Other Information

# SIGNAL WORD

### Danger

#### HAZARD STATEMENT

Highly flammable liquid and vapor. May cause liver and kidney damage.

#### SUPPLEMENTAL INFORMATION

#### **Directions for use**

Fill weight:	Lot Number
Gross weight:	Fill Date:
Expiration Date:	

Copies of the SDS's for all hazardous products, to which employees may be exposed, will be kept in binders easily accessible to the teams in each business entity. We also save shared SDS forms here:

# S:\Safety Docs\08 Safety Programs\03 Hazard Communication

Operations managers for each department are responsible for ensuring the SDS binders are current. Our safety team requires annual review of the SDS binders in each location.

- \* SDS's for the new chemicals are available.
- \* SDS's will be available for review to all affected employees during each work shift.
- \* Copies will be kept available upon request.

## III. EMPLOYEE TRAINING and INFORMATION:

Each employee will be provided the following training and information before working in areas where hazardous chemicals exist. In addition, if a new hazardous product is introduced into the workplace, affected employees will be given new training and information concerning the new product.

### TRAINING:

### Minimum Information to be Provided:

- 1. All operations and locations in the workplace areas where hazardous chemicals are present.
  - a. New hires are assigned to a Hazard Communication training program video through Paylocity.
- 2. The location and availability of the written Hazard Communication program, including the inventory list of hazardous products/chemicals used and their SDS's.

- 3. The method the company will use to inform employees of potential hazards of non-routine tasks (jobs that are not typically routine for an employee because of infrequency, location or type).
- 4. Details of the company's Hazard Communication program including an explanation of the new GHS labeling system, the new GHS format of SDS's and how to obtain and use the appropriate hazard information.

(Optional – Upon completion of the training, each employee will sign a form acknowledging receipt of the written Hazard Communication program and related training)

### Hazardous Non-Routine TASKS:

When & Where Applicable – If company employees are required to perform hazardous tasks that are not routine or part of the employees job assignment, such as welding in a confined space or cleaning a tank once every 6 months, the employer MUST address what hazardous materials and/or procedures are involved specific hazards to which the employees will be exposed to. What Personal protective Equipment (PPE) will be provided and who will be responsible/accountable to oversee the operation/job task.

If the company does not have any hazardous non-routine tasks, then line-out through this section and state "No Hazardous Non-Routine Tasks at this Location"

## Informing Outside Contractors performing work at your location:

It is the responsibility of <u>area operations managers</u> to provide contractors and their employees with the following information:

- 1. Hazardous chemicals to which employees may be exposed to while on/at the job site/area.
- 2. Measures the employees may take to reduce the possibility of exposure.
- 3. Steps the company has taken to reduce the risks.
- 4. The location of the SDS's for which the employees may be exposed to.
- 5. Procedures to follow when the employees are exposed to hazardous products.

## **Outside Contractors Informing the Host Employers/Company:**

Outside contractors entering your/this work location with their own hazardous products will supply/provide the host employer with their SDS's covering those specific hazardous products brought on site where the host employer's employees may be exposed to those hazardous products while the outside contractor performs their job tasks.

(Example: If a pest control company comes on your site to apply their pesticides, then your employees maybe exposed and develop adverse chemical reactions to those pesticides, make certain that your employees are aware of the SDS's of the hazardous products PRIOR to application so that your employees can take appropriate precautions to prevent exposure).

### **Completion Date Requirements:**

December 1, 2013: Employers must train employees on the new label elements and SDS format.

June 1, 2015\* Chemical manufacturers, Importers, Distributors and Employers must comply with all modified provisions of this final rule, except

**Distributors** may ship products labeled by manufacturers under the old system until **December 1, 2015**.

\* This date coincides with the European Union implementation date for classification of mixtures.\*

**June 1, 2016: Employer's** Must update alternative workplace labeling and hazard communication program as necessary, and provide additional employee training for newly identified physical or health hazards.

Transition Period Comply with either 29 CFR 1910.1200 (this final standard), or the current standard, or both for all chemical manufacturers, importers, distributors and employers.

# IV. INVENTORY LIST of HAZARDOUS CHEMICALS/PRODUCTS in the WORKPLACE:

Lacquer Thinner Blend (Whitaker).

Mineral Spirits.

Methyl Ethyl Ketone (Sherwin-Williams).

KemVar 80 Series Conversion Varnish (Sherwin-Williams).

Butyl Acetate (Sherwin-Williams).

Sher-wood Kemvar Reducer (Sherwin-Williams).

Sher-wood Standard Reducer (Sherwin-Williams).

Sher-wood Kemvar Catalyst (Sherwin-Williams).

VM&P Naphtha (Sherwin-Williams).

Sher-Wood Conversion Varnish (Sherwin-Williams)\*\*.

You can attach additional sheet(s) if the above space is not adequate.
