

Century Holdings

POWERED INDUSTRIAL TRUCKS (FORKLIFTS) PROGRAM

No Century Holdings employee shall be allowed to borrow, rent or operate a Powered Industrial Truck on a Century Holdings location unless they have been trained, evaluated, and certification as provided per OSHA Standard - 1910.178.

Training shall consist of formal instruction, practical training, and operator evaluation. Topics to include in the training shall be as follows:

- Load capacity
- Operators instructions
- Stopping distances
- Refueling
- Driving on ramps and slopes
- Visibility
- Load stability and balance
- Equipment controls
- Inspections
- Other site specific topics

Training will be provided by a qualified instructor designated by Century Holdings management.

If operator is observed operating equipment in unsafe manner, has an accident, has changes in worksite conditions, or operates a different vehicle type, refresher training must be conducted before operator can continue operating.

Each operator's qualifications shall be re-evaluated at least every 3 years.

The operators' qualification shall be documented in writing.

Any use and operation of a Powered Industrial Truck (Forklift) shall comply with 1910.178 and manufacturer's operator manual recommendations. Operators Manual shall be available for each piece of equipment and manufacturers safe work practices shall be followed.

Each operator shall inspect the PIT / forklift before each shift

Each operator shall inspect and verify each trailer chocks, dock plate, and supports before loading or unloading.
